- Polygot Programmer
- Mentoring

PROFESSIONAL EXPERIENCE

Product Engineer 2019 • (Remote) Modulz

RESPONSIBILITIES

- Design & develop UI for Modulz main product (visual
  component editor)
- Collaborate on internal infrastructure for frontend &
  backend development
- Collaborate on the product & platforms' direction, based
  on professional experience in the domain
- Represent company interests in Australia at Conferences & Meetups

KEY ACHIEVEMENTS

- Solo exhibition of Modulz at Web Directions Design Conf 2019
- Designed and developed a UI Component Compiler for turning
  visual edits into production-ready frontend code
- Participated in London-based Product brainstorming &
  investor discussions
- QA session for the Product's direction at a Design Lead meetup

Frontend Developer 2019 • Red Eye Apps

RESPONSIBILITIES

- Take product direction to lead development of "Internal
  Growth" projects
- Plan and implement engineering culture improvements
  alongside Engineering, Discipline & Product Managers

Senior Developer 2017-2018 • Rexlabs

RESPONSIBILITIES

- Copy responsibilities from 2016-2017 role, plus...
- Led community engagement initiatives for product dev team
- Bootstrap greenfield projects for a B2B referrals product
- Frontend hiring manager during heavy team growth periods
- Mentorship & code reviews of junior frontend developers
- Organise monthly "hack days" in the development team
- Stewarding open source efforts within the company
- Stewarding the intern program with Coder Academy
- Re-engineer a large brownfield app, enabling SPA UX and
  consistent frontend DX
- Lead further infrastructure direction for frontend with:
  • Monorepos & CI Infrastructure for Components, Libraries
    and Frontend Apps to enable sharing of code and domain
  • A frontend toolkit for creating, developing, & testing
    "rexlabs stack" packages & projects

KEY ACHIEVEMENTS

- Took a holiday
- Sponsored speaker at BrisJS & ReactBris
- Initiated team events and catchups
- Created internal organisation tools
- Had a slack emoji named after me

PROFESSIONAL EXPERIENCE CONT.

Mid-Senior Web & Mobile App Developer • Rex Software • 2016-2017

RESPONSIBILITIES

- Copy responsibilities from last mentioned role, plus...
- Light mentorship in frontend team hires with code reviews
- Lead new infrastructure direction for frontend team
  (React, CSS-in-JS, Modules, NPM, CI/CD, Code Review)
- Team lead during some MVP mentioned below
- Bootstrapping of greenfield projects:
  • Mobile version of the main CRM product (React Native)
  • Admin app for in-house design system product
  • Responsive web app for B2B referrals

KEY ACHIEVEMENTS

- Devised a catch-all solution to css-in-js theming at scale
- Accidental wheel-reinvention; Database in Redux

Junior/Mid Web App Developer • Rex Software • 2014-2016

RESPONSIBILITIES

- Feature & maintenance work in multiversion wordpress app
- Feature & maintenance work in large brownfield SPA (knockout + php)
- Lead frontend for tech decisions & bootstrapping of
  internal product hacks (React + Flux/Redux)
- Deliverables based around agile sprints
- Participate in frontend team interviews
- Team task planning & management
- Technical customer support
- Self development of fundamental web knowledge
- Develop two public facing product websites
  • Siteloft
  • Rex Software

KEY ACHIEVEMENTS

- Led introductions to improve stability in wordpress apps
  • Containerised deployment pipelines
  • SPA partial routing
- Led introductions to modernise JS & UI patterns in brownfield SPA
  • Frontend build tooling (bespoke gulp + browserify)
  • React for isolated feature work
- Hacked a "sprint dashboard" for office TVs
- POC "CRM Contacts" Mobile App (React Native 0.5.0)
